Dear Bram,

Reference: Volatile Organic Compounds (VOC's)

With reference to your question regarding VOC's within fount solutions I can confirm the following.

The EU definition of a VOC is as follows:

"A VOC is any organic compound having an initial boiling point less than or equal to 250 °C measured at a standard atmospheric pressure of 101.3 kPa and can do damage to visual or audible senses."

I can therefore confirm that the Fount Solutions listed below are classed as VOC free.

I trust that this satisfies your requirements but please contact me should you have any further questions.

Yours faithfully,

Anthony Jones
Director.

Product Code	Description
CTF301	Good News Fount TA Solution
CTF302	Prema Fount Solution
CTF303	Tech Fount Solution
CTF304	Velociter Fount Solution
CTF305	Osmofix Water Conditioner
